BIG M ONLINE JOURNAL BASIC APPLICATION FRAMEWORK

In software development, a framework is a defined support structure in which another software project can be organized and developed. A framework may include support programs, code libraries, a scripting language, or other software to help develop and glue together the different components of a software project. Basic application framework is as follows:

- Web based application.
- Database driven.
- User friendly interface.
- Easily Configurable.
- Various Authentication level.

Big M Online Journal Application

Journal Application features are described below:
