- HELPS STABILIZE PRODUCTION
- SINGLE COMMUNICATION TOOL
- INCREASE EFFICIENCY
- LET THE DATA TELL THE STORY
- INCREASE COMPANY REPUTATION, GOODWILL AND IMAGE

BIG M PRODUCTION MANAGEMENT SYSTEM THAT HELP TO REDUCE PRODUCTION COST & BOOST YOUR PRODUCTIVITY

Big M Production management system – is a solution developed by BIG M Resources Ltd for managing and tracking various production and related activities in any manufacturing company. It is a cloud based application thus any computer or a thin client can get access of it. All it requires is a web browser and account to login.

Every manufacturing house or trading company finds it difficult to manage the entire process flow starting from lead management, quotations, order booking, scheduling jobs, material management, machinery management, packing and delivery of produced goods, tracking at each stage and final payment follow ups and accounting.

Big M Production management system is developed with the aim to first digitize the process, reduce the time and effort in managing this activity and finally to obtain the most useful information from the daily operations that help apply intelligence to business. Our System is secured by enabling only the authorized user to access the modules which they have rights to use. Different hierarchy of users can be created and managed easily by the company.

BIG M RESOURCES LIMITED

House No: 17/1B, Block-B, Babor Road, Shaymoli, Mohammadpur, Dhaka-1207, Bangladesh.

Production Management System

PRODUCTION MANAGEMENT SYSTEM SETUP

Various Setups available in Production Management System are (and not just these many, but many more):

- Company Setup – company, production sites, warehouse
- Party setup – customer, suppliers, vendors, transporters
- Material setup – raw material, spares
- Order setup – order characteristics, order generation
- Production/Manufacturing – process flow definition
- Machine setup – specification, throughput, AMC
- Accounts setup – taxation, excise
- User setup – users, departments, positions, activity, access control

MODULES

Modules of Production Management System that make use of these setups are:

- Main Module: order processing, production tracking, dispatch tracking, back office activities, inwards and outwards, inventory tracking, purchase process, etc.
- Supportive modules of Production Management System are: wastage tracking, and synchronization among various operating locations.

ALERTS

At each stages of pre-production, production and post-production – respective parties are triggered and notified by email and SMS, as required.

REPORTS

More than 10 pre-defined reports and several customizable reports can be obtained from the Production Management System. These reports are in PDF print format or/and excel format as well. Most of the reports are daily, weekly, monthly emailed to managers via system.

REQUIREMENTS

Production Management System can be installed on any windows server and can be connected to other PCs or thin client machines. A standard internet or intranet connection is required for access.
